MAYOR'S INAUGURAL ADDRESS

I would like to open my remarks by extending to one and all a sincere wish for a Happy and a Prosperous New Year. I also desire to welcome back the three new Aldermen in this Council who have shown their interest and ability in previous Councils.

This evening we assume our responsibilities as elected representatives of the citizens of Kingston for the years 1947 and 1948. The aftermath of the greatest destructive war of mankind is still with us. Unrest and suspicion are rife throughout the whole civilized world affecting problems of government from the highest to the lowest level. The dogged persistence of the nations of the world assembled together in an endeavour to erase the effects of the war, strikes, however, an optimistic note. We can best help by working efficiently within our own sphere of government. We have an experienced council and I look confidently toward the future knowing that Kingston is assured of a continuance of good government.

It is customary at this time to comment upon the salient features of the past year and to put forward some suggestions for the consideration of Council during the coming year.

I am pleased to report that there are indications that a substantial current fund surplus will be carried forward to this year. This surplus has arisen largely from increased revenues. There will, however, be a deficit in the garbage collection rate but not of serious proportions.

Our tax collections have continued to be exceptionally good. 97.4% of our current levy was collected during the year. At the end of the year total arrears amounted to less than $31,000.00 and no taxes are in arrears beyond 1943.

During the year $162,687.00 debenture debt was retired or provided for by payment into the sinking fund. New debt incurred amounted to $144,400.00. Our net debenture debt at December 31st, 1946 is $1,091,511.00. This is not, however, the full picture. Debentures will shortly be issued aggregating $500,000.00 of which $300,000.00 will be for school and Corporation purposes. Later in the year, another large issue will be made to cover the cost of the new Frontenac School and local improvement works completed during the past year. I say this to add a note of caution. Our debenture debt is not unduly large and to meet the needs of a growing city we must expect to see a substantial increase in our debenture debt. But let us scrutinize carefully every demand for new capital commitments. We have an excellent financial reputation and can command very high prices on debenture sales. We can only continue to enjoy this reputation by an orderly increase in our commitments in keeping with our taxing ability. I believe one of the foremost accomplishments of last year was the observance of our Centennial Year as an incorporated city. I will not dwell on the details of the celebration save to say that it was a decided success and, in my opinion, served to inculcate in the minds of all citizens a finer appreciation of the great historical past, a rededication of loyalty to the representative of the King, and the future prospects of Kingston.

Another achievement of last year was the successful completion of arrangements with Housing Enterprises Limited for the erection of 88 permanent houses for rental to veterans and servicemen. These houses should be ready for occupancy early in this year. In measuring the contribution of the city, the proportion of the cost of services which ordinarily would be assumed by the city had the property been privately developed should be excluded. On this basis, our contribution amounts to approximately $34,000.00. The city will benefit immediately, however, from the full taxation of the houses. While it is not properly the function of the municipality to enter into housing schemes, we cannot ignore the plight of those who endured the ravages of war to protect this country and now find themselves victims of the housing shortage.

During the period of your office you will be called upon to spend considerable time in the interests of the city and I am assured that you will do it willingly and conscientiously.

Prior to last year the duties of aldermen were made more exacting because of the large number of standing committees. These committees have been reduced in number. I believe that you will agree that the change has resulted in a more efficient administration of this city and has made less demand upon those who are willing to give of their time to assist in the management of the city.

The annexation proceedings for the area on the western boundary of the city which were instituted last year cannot be completed until ratified by Private Bill at the next session of the legislature. This was made necessary by an amendment to the pertinent sections of The Municipal Act and until ratification is obtained no services can be extended to this fast developing area.

I would particularly like to express here commendation for the whole-hearted co-operation I have received from Judge Reynolds and Magistrate Garvin on the Police Commission during the past year. Their services far surpassed the requirements of their offices and have contributed greatly to the present standard of efficiency in the department. Especially noteworthy was their interest in traffic control and the institution of the system of school traffic aides.

At this time I think I should also express a word of commendation to Capt. R. J. Robinson who has retired as Chief Constable after 27 years of conscientious and faithful service and to express best wishes to his successor, Chief Truaisch, who has displayed an adeptness in the manner in which he has taken over the affairs of the department.

The proposed alterations to the City Buildings were not acceptable to the ratepayers at the last Municipal elections. Some of the proposals may well be postponed but it is absolutely essential that more adequate accommodation be afforded the Police and Social Welfare Departments. Some means of fire detection or control should also be installed in portions of the buildings and a complete survey of the wiring in the basement should be made. I would suggest to the Parks and Property Committee that these matters be given early consideration.

I understand that this committee last year with the able assistance of Mr. Phillips, the Parks Superintendent, was considering embarking this year upon a programme of beautification of our city parks. I think this is a worthwhile civic endeavour and I sincerely trust it will be continued by this year's committee.

For many years we have been discussing a sewage disposal system. Had it not been for the war, Kingston undoubtedly would now be enjoying the benefit of a water-front free of pollution. Meanwhile, the original scheme has been enlarged and the estimated cost increased considerably. While it does not appear feasible to embark upon a scheme of this size during the immediate future, I do think that we should keep it ever before us. We have been able to obtain an excellent film on this subject entitled "Clear Water" and I sincerely trust that it has a wide showing throughout the city.

The Engineer's Department is presently coping with the difficulties of snow removal. It must be admitted that we have had an unusually heavy fall and there must necessarily be some inconvenience. I am not in a critical mood when I suggest the advisability of a complete survey of our snow removal operations and equipment.

I would remind Council of the activities of the Marsh Land Committee. We have encountered some difficulty in developing the plan but with the establishment of the new Subsidiary Planning Board under The Planning Act 1946, it is hoped that progress will be made in this matter.

During the past year we have been negotiating with the Federal Government with a view to having a Municipal Dock constructed here in Kingston. I am hopeful that when the proper time comes for such projects as this, Kingston will not be ignored.

The cost of municipal services has been rising steadily due in part to their extension and in part to the increased cost of labour and supplies. This trend will continue with a resultant increase in taxation. I would suggest to you that the low basis of assessment of land and buildings in Kingston results in a disproportionate tax rate and reflects unfavourably relative to other municipalities. We are also losing on our annual municipal subsidy in that our total rateable assessment is proportionately lower relative to other municipalities.

I believe it would be possible to justify an overall percentage increase in the assessment basis. The relative position of the taxpayer would not be worsened and there would be a better comparison of our tax rate with that of other municipalities. Further, the city would receive a more equitable proportion of the annual municipal subsidy. I would like to have the Administration and Legislation committee consider if there is any merit in this suggestion.

My predecessor in office constituted a strong citizens' committee to press for a new C.N.R. station. The committee was successful in effecting some improvements but the time was not favourable for any definite commitments. I propose to reconstitute the committee and again press for recognition of our not unreasonable demands.

In closing, I would like to pay public tribute to two prominent citizens who have recently passed away but who have left their mark upon the city they cherished so much. I refer to Collamer C. Folger, General Manager of the Public Utilities, and Hugh C. Nickle, a public-spirited citizen who served the city in many capacities including that of Mayor. Their lives have enriched Kingston and have set an example for others to follow.

UNFINISHED BUSINESS

Ald. Tugwood complimented Fire Chief Brightman on the Annual Report of the Fire Department for the year 1946. He expressed the hope that the Administration and Legislation committee would implement some of the recommendations contained in the report.

Ald. Compton, in reference to Clause 3 of the Finance report, stated that he was not in favour of the resolution because it would mean less materials for house building, but he could not take a definite stand against it because he believed the City Engineer could be compelled to issue a permit. He stated that, in his opinion, the restriction of non-essential building could be controlled only by the Federal Government and he quoted statistics of construction indicating that much of the required building materials were being used in industrial construction work.

Ald. Casterton objected to the present system of garbage and ash collection. He suggested that there seemed to be no apparent control over the collectors and asked that a committee be appointed to work with the Board of Works to remedy the situation. Ald. Compton, in reply, stated that the Board of Works was well aware of the difficulties. He stated that it was not possible to hire good men at the present wage scale and he assured council that the matter would be carefully considered at the next meeting of the committee.

Ald. McCullough reminded council that some time ago he had requested that the garbage collection on Princess Street be made in the morning. He stated that this had been done but since the revision of the routes the collection on Princess Street had reverted back to the afternoons.

Ald. Garrigan requested the Administration and Legislation committee to take up with the Kingston City Coach Company Limited the question of overloading the buses during the rush hours. He stated that the Earl-Victoria route was particularly bad in this respect.

Ald. Stabler agreed with Ald. Garrigan and observed that we were very fortunate in that we have had no serious bus accidents.

Ald. Casterton remarked on the distinct improvement in the Princess North bus route but he also agreed that the buses are still overcrowded.

Ald. Tugwood referred to the recent change in the Princess North bus route during rush hours and stated that he had been assured that if the change proved to be satisfactory it would be continued. He asked that this matter be taken up with the company.

Ald. VanLuven suggested that the Sunday bus routes be arranged for the greater convenience of those citizens using the buses to attend church services.

Ald. Compton inquired if the company could arrange to have the snow removed at the bus stops. Ald. Curtis, in reply to the above comments, advised that the committee was constantly in touch with the company and he contemplated having a full discussion on these matters in committee.

Ald. Tugwood requested the Parks and Property committee to give immediate consideration to the need of the Social Welfare department for adequate office accommodation.

Mayor Crawford referred to the attendance of aldermen at committee meetings of which they were not a member and reminded council that under Rule No. 49 of the Rules of Procedure this practice did not apply to the Finance committee.

UNFINISHED BUSINESS

Ald. Casterton referred to the offer of Mr. A. S. Watts to grant the Corporation free use for a city dump of 22 acres of marshland owned by Mr. Watts and situated on the extreme corner of the city northeast, south half of farm lot No. 4. This matter was referred to the Board of Works.

Ald. McCullough reminded council that he had asked that the garbage on Princess Street be collected in the morning and pointed out that, on a windy day during the previous week, this not having been done, newspapers, etc., were scattered all over the north side of Princess Street. He mentioned that as of noon to-day garbage on Princess Street was uncollected.

Ald. Compton stated that he had brought the matter of the previous week to the attention of the City Engineer and assured council that this condition would be adjusted in the future. He mentioned that he had been in touch with the City Engineer to-day and that he had been told that the garbage from one side of Princess Street was being cleared at noon and that the other side would be taken care of subsequently.

Ald. Byron referred to the expenditures for snow removal equipment and contended that much money would be saved by the purchase of such equipment.

Ald. Compton explained that the Board of Works had given careful consideration to this matter and had decided that it was not advisable to purchase a bulldozer and some other pieces of equipment but that the City Engineer had been instructed to contact War Assets Corporation as to the availability and purchase of a bulldozer.

Ald. Chown pointed out that, from experience, he believed trucks with operators could be hired more cheaply.

Ald. VanLuven mentioned that it was an expensive proposition to have summer conditions in winter time and advocated that a happy medium be adopted. He believed that it was preferable to rent trucks for a few weeks for snow removal than to own them all year.

Ald. Compton referred to the six-point programme for Kingston advocated by the Chaamber of Commerce at their meeting on February 17th and objected to some apparent misunderstanding, in that, the Chamber did not appear to take into consideration the fact that city council already had these items in mind. In regard to industrial expansion particularly he mentioned that the Board of Works were already considering a plan of the area off Division Street to be set aside for industries. He also referred to the film "Clear Water" being shown after the meeting and pointed out that it was sponsored, not by the Chamber of Commerce, but by City Council. He mentioned that the Mayor and he had seen the film in Toronto and at that time believed that it would be interesting to have it shown in Kingston. He was of the opinion that steps should be taken to start a programme of instruction on sewage disposal and suggested that a By-law might be presented to the electorate at the next municipal election.

Ald. de St. Remy commended the Parks and Property committee on the progress made on the conservatory at Sunnyside.

Ald. Byron asked the chairman of the Administration and Legislation committee if any action had been taken on the request of the firemen for shorter hours.

Ald. Curtis, in reply, stated that the question had been considered very carefully and the committee had come to the conclusion that it would be inadvisable to adopt a 56-hour week at this time. He pointed out that at the present time there are only about six municipalities, including larger centres than Kingston, which have shorter hours. A 56-hour week would cost approximately $12,000.00 additional and as the cost of municipal services has already increased it was not felt that this scheme should be adopted at this time. The position of the firemen had been improved during the past few years as regards working conditions in several ways, the institution of the annuity scheme being one example.

Ald. Compton inquired if any compromise had been considered. He suggested a possible increase in wages to compensate for longer hours.

Ald. Stabler pointed out that the city had grown considerably during the past few years. If the hours were reduced more men would be required and would be on call in the event of a large conflagration. He did not believe that any man today should be asked to work 72 hours per week.

Ald. Curtis pointed out that while the men were on duty 72 hours per week they were not ordinarily working the whole time.

Ald. Tugwood mentioned that residents in Frontenac Ward had been complaining of the smoke nuisance from Frontenac school.

Ald. Curtis pointed out that Military Headquarters were also offenders in this respect.

Ald. Stabler mentioned Rockdale Dairy and asked if the city would permit this dairy to make structural changes to enable them to install an oil burner which would eliminate smoke from their building.

Ald. Compton explained the position of the city as regards the Zoning By-law and pointed out that it was extremely difficult to legislate against the smoke nuisance.

Ald. Hoag suggested that some action should be taken to put an end to the smoke nuisance.

The Mayor referred to the six-point programme advocated by the Chamber of Commerce. He mentioned that the Marsh Land committee had the matters pertaining to it under consideration, that consideration was being given to the establishment of an industrial area and that the Chamber of Commerce was working closely with the committee in this respect; that the campaign for a new station had not been shelved and that plans for a Municipal Dock were being laid as a project for labour when times were not so prosperous. He mentioned that the Corporation had attempted to acquire by trade, or some other equitable means, suitable property from the Department of Public Works for expansion but that such attempts had so far been unsuccessful.

Ald. Charlton pointed out that the city should look ahead to the future and consider the purchase of suitable property for municipal purposes.

After the showing of the film "Clear Water" Ald. Hoag asked if this film could not be shown to the public in Memorial Hall.

The Mayor said that some arrangement would be made for a public showing of the film.

Moved by Ald. Curtis, seconded by Ald. Hoag, (7) that a By-law to Provide that every elected Member of any local Board as defined in The Department of Municipal Affairs Act be elected at the same time and hold office for the same term as the members of the council, be given its first reading.—Carried on the following division: For (17), Against (0).

UNFINISHED BUSINESS

Ald. Charlton inquired if any further steps had been taken to acquire the Marsh Lands.

Ald. Curtis, in reply advised that this matter had been held over until the Subsidiary Planning Board was constituted and he fully expected that the appointments to this Board would be brought to City Council at the next meeting.

Ald. Chown referred to a request from the Imperial Oil Company Limited for permission to erect storage tanks for fuel oil on their property on Rideau Street. He stated that while he was thoroughly sympathetic to the need and wishes of the residents of Cataraqui Ward he did not believe that the proposed location of tanks was near residential properties and believed that the Board of Works should give further consideration to the request especially in view of the scarcity of fuel oil in the city.

Ald. Charlton suggested that the oil companies join in the development of a portion of the Marsh Lands.

Ald. Compton advised Council that this matter had previously been before City Council and the Board of Works and had been turned down but he understood that some Aldermen had not been fully informed on the application. He stated that he had been assured that such installation would not affect the fire insurance rates on buildings in the vicinity.

Ald. Casterton stated that as a representative of Cataraqui Ward he opposed the application. He stated that since this request had been brought forward again it should be defeated and disposed of for all time.

Ald. de St. Remy stated that the City Engineer had been in error in saying that tanks could be erected at the rear of the property. He preferred to support the people of Cataraqul Ward and in any event could not approve of any amendment to the By-law which might increase fire hazards.

Ald. Stabler advised Council that he had voted against the application on the understanding that the insurance premiums for the immediate vicinity would probably be increased. He has since discovered, however, that insurance rates would not be affected and since our By-law requirements are in excess of what is required by the underwriters he is prepared to give the matter further consideration.

Ald. de St. Remy reminded Council that there are two companies installing half million gallon tanks for fuel oil.

Ald. Hoag inquired how the Board of Works had dealt with this matter and had not reported their decision to City Council.

Ald. Curtis reminded Council that an amendment would be required to the City By-law and it certainly could not be proceeded with at this meeting.

At this point in the discussion, Mr. D. Torney, Manager of the Imperial Oil Company Limited addressed City Council in further explanation of the application of his company.

Ald. Compton suggested that Mr. Torney approach the C.P.R. to see if sufficient land could be purchased from them to permit the installation of tanks at the rear of the property.

Ald. Megaffin requested that the Board of Works give further consideration to the matter.

Ald. McCullough stated that he thought the parking on streets adjacent to the parking meter area was to be restricted. He inquired if steps had been taken to limit parking on these streets.

Ald. Casterton criticized the location of meters at Clarence and Brock Streets.

Ald. Megaffin inquired why the meters have not been put in working order.

Ald. Garrigan referred to the city-owned gas lamp at the corner of King and Lower Union streets and suggested that it be repaired and kept in proper condition.

Ald. Stabler referred to the recent editorial in the Whig-Standard on snow removal and believed that the paper should be thanked for their interest in the matter.

BUDGET FOR THE YEAR 1947

March 19th, 1947.

To the Mayor and Members of City Council:

Gentlemen:—The Finance committee begs leave to present for the consideration of city council the Budget for the year 1947.

With the prevalent rise in materials and wages and the expansion of municipal services it is inevitable that the municipal tax rate should rise. Your committee, however, has been concerned with extent of the increase for 1947, being aware that future requirements for capital construction and expanding municipal services will involve additional taxation. The committee is pleased to report that, after a careful review of the estimates the proposed expenditures under the jurisdiction of the council and provided for under the city council tax rate have been maintained at a point which will involve no increase in the rate over that of last year and your committee believes that these estimates will provide for a reasonable maintenance of city property and services.

As indicated in the following Comparative schedule of Mill Rates—it is recommended that a total tax rate of 41.35 mills be adopted for the ensuing year, comprising a general rate of 39.05 mills inclusive of the rate for school purposes and a Garbage and Ash Collection rate of 2.30 mills. The changes in the tax rate from the previous year are set out in Table 2.

Although committee expenditures have in many instances increased substantially, the maintenance of the city council rate has been aided by the current surplus carried over from the previous year, the increase in assessment and improvement in revenues. Provision has been made in the estimates for the new Provincial road subsidy to the extent of one mill. Against this revenue item, however, has been placed an amount of $10,000.00 for resurfacing. To this sum may be added the unexpended balance of approximately $14,000.00 from last year's programme.

There has been a substantial increase in the rate for garbage collection. For the most part of last year a double staff was employed at the incinerator and this contributed largely to the deficit of $7,413.12 which must be levied for this year. The wages in this department have been increased and provision of $4,000.00 has been made towards the purchase of three new refuse go-getters. The Board of Works has been concerned with the need for an enlargement of the facilities of the incinerator and a recommendation of the Board in this respect is being forwarded to city council.

The increases in the estimates of the Social Welfare committee are confined for the most part to Direct Relief, Isolation Hospital and the Care of Neglected Children. These substantial increases over the appropriations of last year set out in sharp relief the heavy incidence of municipal taxation for social service and over which municipal councils have little or no control. The estimate for neglected children makes provision for an increase in the statutory per diem rate of the C.A.S. from 75c. to 85c. and for a grant to the society of $3,000.00. The Social Welfare committee also requested that the appropriation of $1,500.00 in the committee estimates of last year for the appointment of a family worker be paid over to the Society to be applied against the accumulated deficit. This latter item, however, has been closed out to the surplus and, if paid, provision will have to be made from Finance "Sundries".

The estimates of the Police Commission provide for an increase in the scale of salaries and for the appointment of two additional constables.

The sharp increase in the municipal tax rate suggests the need for a consideration of a change in our basic rate of assessment. An overall increase in assessment would, of course, not reduce the amount of tax money required but it is believed that our basic rate of assessment is low relative to other municipalities. It is not desirable that the tax rate in Kingston be artificially higher than in other municipalities because of a lower basis of assessment.

Respectfully submitted,

Members of the Finance Committee.

UNFINISHED BUSINESS

Ald. McCullough stated that he was surprised to learn that the Treasury Department was not keeping a complete accounting of the revenue and expenditures on parking meters. He believed that such an accounting should be maintained so that this information could be made readily available to Council. He also expressed objection to the length of the No Parking area in front of theatres and to the length of bus stops. He referred to the bus stop on Princess Street at Bagot Street which had originally been placed at 120′ and inquired how this could be done without the authority of the Council.

Ald. McCullough also referred to his repeated requests for the erection of a light on Montreal Street between Princess and Queen Street. He stated that he had requested this light before Montreal Street was re-surfaced but the light had not yet been erected. He stated that there had been correspondence between the Engineer's Department and the Kingston Public Utilities and a suggestion had been made by the Public Utilities that an overhanging light be erected on the east side of Montreal Street. He reminded Council that the street at this point was very dark and a light should be erected without further delay.

Ald. Byron expressed the view that the members of Council in voting for the installation of Parking Meters had ignored the interests of the residents of St. Lawrence Ward.

Ald. VanLuven explained the reasons for the No Parking areas in front of the theatres. He stated the bus stop on Princess at Bagot had been made 120' in error but had since been reduced to 60′. He advised council that the Special Committee of the Board of Works had considered proposals for restricted parking on the streets adjoining the metered areas and a recommendation will be made to the Board of Works at the next meeting for submission to City Council

Ald. Curtis inquired on what authority the No Parking areas were set out. He stated that the report of the Board of Works suggested 50′ bus stops if possible and at no time to his knowledge were 60′ bus stops ever recommended to Council.

Ald. Byron pointed out that the hydrant near the Grand Theatre was covered and it was therefore not necessary to lengthen the No Parking area in front of the theatre because of this hydrant.

Ald. Chown suggested that parking be permitted in front of the theatres during that portion of the day when the theatres were not open.

Ald. Stabler inquired why the hydrant near the Grand Theatre had been covered. He observed that, in his opinion the hydrant should be uncovered and made readily accessible in the event of fire.

Ald. Megaffin expressed the opinion that Council was perhaps overly critical since the meters have only been in use a short time. He stated that he was not opposed to the meters but he would like to have the meters straightened and painted. He also observed that the bus stops have not been properly marked.

Ald. Tugwood opposed the covering of the hydrant at the Grand Theatre.

Ald. Curtis referred again to the length of bus stops and inquired who was going to decide the proper length.

Ald. Crawford remarked that City council was the only authority to decide the length of the bus stops. Speaking of another matter, he asked the Board of Works to have the curb on the west side of King Street, between Brock and Princess Street, repaired.

Ald. Stabler referred to Ald. VanLuven's remarks concerning the Special Committee on Traffic and observed that, to his knowledge, no such Committee had been appointed this year by the Board of Works.

Ald. Hoag contended that if the Special Committee is to continue it should be reconstituted.

Ald. Chown inquired how the length of the bus stops is determined. He pointed out that there is a No Parking area under the By-law of about 20′ from the curb and the bus stop should be measured from beyond that point.

It was agreed that the Board of Works would report to Council on the bus stops.

Ald. McKee referred to a previous discussion in Council on the height of the new tool shed in Macdonald Park. He stated that he has since determined that the walls have not been increased in height.

Ald. Stabler requested assurance that consideration will be given to the purchase of a snow blower. He contended that this should be done without delay if the equipment is to be on hand in time for next winter.

Ald. Charlton requested that more lights be erected in the City Parks. He stated that parks at the present time were very poorly lighted and were unsafe at night time for unaccompanied women.

Ald. Curtis inquired if it would not be advisable to have the Public Utilities undertake a survey of street lighting throughout the City. He believed that the present method of adding street lights was haphazard and many residential streets were still poorly lighted.

UNFINISHED BUSINESS

Ald. McCullough advised that garbage collection on Princess Street was now being made before noon and the merchants were entirely satisfied with the arrangement. He suggested, however, that the rubbish containers at the street corners be dumped at the time the collection is made from the premises and damaged ones should be repaired.

Ald. McCullough also inquired what action had been taken by the Special committee of the Board of Works on restricted parking for the streets adjacent to the metered areas.

Ald. de St. Remy observed that at present street lights were being erected indiscriminately. He believed that a full report should be submitted for the city as a whole.

Ald. Casterton referred to press reports that a large number of men were cleaning the city streets. He stated that while street cleaning had been in process for at least two weeks no street cleaning had been done in the north end. He asked that the men be evenly divided in the various districts of the city.

Ald. Compton, in reply, assured council that there was no discrimination in street cleaning. He stated that there were many other streets in the city which have not as yet been cleaned.

Ald. Allan suggested that consideration be given to making Earl Street at Victoria a stop street. He believed that this was a dangerous corner and the hazard would be greatly reduced by requiring vehicles on Earl Street to stop when approaching Victoria Street.

Ald. Curtis referred to the resolution received from the Municipal Board of Education concerning the change in the mode of election. He stated that the request had been received in the first instance from the Public Utilities Commission and had been brought to city council February 24th. The local boards were then advised of the proposed change and an acknowledgment was subsequently received from the Separate School Board. The final reading to the By-law was not given until after four weeks from the date of the first presentation in city council.

Ald. Charlton requested that consideration be given to the installation of public lavatories. He stated that at the present time there was no accommodation for citizens in the downtown area.

UNFINISHED BUSINESS

Ald. Casterton requested that a letter be forwarded to the Dye and Chemical Company asking that they expedite the erection of a smoke stack at their plant.

Ald. Casterton referred to a house that was removed from Barrack Street to Cataraqui Street, the authorization of which was conditional upon the house being hooked up with a sewer. To date this condition had not been complied with.

Ald. Casterton stated that his attention has been drawn to the abuse made of the special stickers issued in accordance with the Parking Meter By-law to "authorized emergency vehicles".

Ald. Casterton made reference to some difficulties that had been met with because of parking meters having been erected in front of the Salvation Army and St. Andrew's Church with particular reference to occasions when weddings, funerals, etc., were being conducted. The Mayor advised that such difficulties would be overcome if the Police department is notified one hour prior to the time of these events and upon such notification hoods would be placed on the parking meters.

Ald. Hoag made a similar reference to the foregoing as it referred to the delivery of coal to the Y.M.C.A. He was advised that upon notification the similar precaution of placing hoods on the parking meters would be taken.

Ald. Tugwood stated that if River Street was extended from Rideau to Division Streets a number of lots could be made available that could be advantageously used by returned soldiers in the erection of residences.

Ald. Hoag inquired as to the state of progress being made in the area west of Helen Street with particular reference to streets running east and west and north and south and the elimination of dead end streets.

Ald. Compton suggested that the Administration and Legislation committee review By-law No. 31 of the revised By-laws with particular reference to the amending and enforcing of the requirements pertaining to the erection of fences.

UNFINISHED BUSINESS

Ald. Stroud expressed his appreciation and thanks to Ald. Megaffin for the excellent concert staged at the Megaffin Baseball Stadium on Sunday evening, August 10th, 1947. Ald. Casterton similarly expressed his appreciation and suggested that the chairman of City Parks give consideration to the holding of additional Sunday evening concerts at the same location.

Ald. Byron and McCullough illustrated the distressing circumstances in the Princess and Barrie Sts. district arising from the density of smoke emanating from the plant of the

Kingston Steam Laundry. Acting-Mayor Curtis advised that he had received information from Police Chief Truaisch that the laundry had new furnace equipment on order that would overcome this smoke nuisance and that it was expected that this new equipment would be installed during the first week of September, 1947. Ald. Compton further advised that the City Engineer was preparing a statement in which would be shown the types of equipment being used in American cities to control smoke nuisances.

Ald. Casterton made reference to the nuisances created by the burning of brushwood, garbage, etc., at the City Dump. Ald. Compton explained that the nuisance had, to some extent, been caused by the Public Utilities Commission depositing combustible rubbish at the City Dump and that requisite action had been taken to prevent a recurrence of this, also that the work at the City Incinerator was progressing to a point where its facilities could be used to a greater extent.

Ald. Garrigan enquired if any report had been submitted pertaining to the proposal to establish a public toilet in the downtown section of the city. Ald. Charlton in reply advised that this matter had been very thoroughly studied and that because of the heavy expense that would be entailed no recommendation had been made.

Kingston, October 28th, 1947.

To the Mayor and Members of City Council:

Gentlemen:—The committee on Administration and Legislation begs leave to report and recommend as follows:

2. That the following principle be adopted in approving applications received from residents of townships adjoining the City of Kingston to connect to the city's sewerage system:

(c) That in the event that the properties in the townships for which the sewer connections are approved are annexed by the City of Kingston that the rate at the time of such annexation be revised and reduced by the amount of the percentage for overhead expenses so that the rate will conform to that charged city users of the sewer.

3. That the application of William Brown to connect to the new Division Street sewer in accordance with the principle invoked permitting non-residents of the City of Kingston to connect to the city's sewerage system, be approved.

UNFINISHED BUSINESS

Ald. Byron advised council that the Regent-Johnson bus beween the hours of 4 p.m. and 6 p.m. was so crowded that prospective passengers were sometimes forced to wait for half an hour to get a bus and asked if an extra bus could not be put on between the hours of 4 p.m. to 6 p.m. to alleviate the condition. The Acting Mayor advised that this matter would be taken up with the bus company.

Ald. Compton suggested that the re-establishment of the bus stop at the corner of Princess and Frontenac Sts. should be considered.

Ald. de St. Remy inquired if anything had been done in connection with negotiating a new agreement with Wartime Housing. The Acting Mayor advised that he hoped that a new agreement would be negotiated before long.

Ald Garrigan asked if anything would be done in connection with the forthcoming marriage of Princess Elizabeth. The Acting Mayor advised that the committee on Finance and Accounts had discussed the matter and the concensus of opinion seemed to be that if any action is to be taken by the Corporation it might better be through the provision of money for food for distribution in Britain. Ald. Hoag remarked that if the matter was being discussed by the committee on Finance and Accounts some action should be taken immediately.

Ald. Charlton suggested to the Board of Works that canvas might be used in conjunction with the ash trucks to eliminate complaints of dust from ashes as they are being collected.

Ald. Charlton drew attention of city council to an advertisement in the Whig-Standard, Montreal Gazette and Globe and Mail on May 21st, 1936, asking for tenders for the sale of the Canadian Terminal System Ltd., site situated on Cataraqui Bay, Kingston, and stipulating that an elevator be erected on the present site, to be completed within two years from date of purchase. Ald Charlton pointed out that this latter condition had not been met and suggested that the city acquire the land. Referred to the committee on Administration and Legislation.

Ald. Megaffin pointed out that he did not appreciate the criticism of the Police Department by Chief Justice McRuer which appeared in the press recently and suggested that the Acting Mayor check on it and have it lifted. The Acting Mayor, in reply, stated that the Board of Police Commissioners felt that the criticism was not justified but that it was thought inadvisable to enter into any controversy over it; he also stated that the Police Department was functioning both effectively and efficiently.

UNFINISHED BUSINESS

Ald. McCullough voiced the displeasure of the merchants on the ruling of The Ontario Hydro Electric Power Commission prohibiting the lighting of window displays during and after business hours, and pointed out that this prohibition was a particular hardship during the Christmas season. Ald. Byron said that he understood that the Merchants Association in Toronto had lodged a protest against the ruling. Acting Mayor Curtis pointed out that the ruling had been put into effect by the Ontario Commission, therefore it was beyond the jurisdiction of the local Commission.

Ald. Byron called attention to the letter in the newspaper referring to a veteran on Willingdon Avenue having been asked to move his picket fence back from the sidewalk because it violated the regulations governing the erection of fences on city property, and suggested that a survey be made to determine if there were other property owners violating the regulations and if so that they be forced to comply with them. Ald. Stabler pointed out that the letter was somewhat misleading because the owner had asked for permission after the fence had been erected.

Ald. Compton referred to the editorial and letters which had appeared in the press regarding street signs and explained that an order had been placed for a number of new street signs of a modern and durable design, and if these were found satisfactory more would be ordered.

Ald. Casterton asked if something could not be done to make the merchants more conscious of Remembrance Day and suggested that it be proclaimed a public holiday, in part if not in full, so that employees could attend the Remembrance Day services. Acting Mayor Curtis, in reply, pointed out that Remembrance Day was a statutory holiday, so it did not seem necessary to have it proclaimed by the city. Ald. Hoag said he believed the observance of Remembrance Day was the responsibility of The Retail Merchants Association.

Ald. Casterton reiterated his request that consideration be given for the placing of a larger light on Division Street between Raglan Road and Sixth Street.

UNFINISHED BUSINESS

Ald. Tugwood stated that, in his opinion a cheque instead of a medal would be more acceptable to members of the Fire Department in recognition of long service in the Department and suggested that the committee on Administration and Legislation give consideration to such a proposal.

Ald. Crawford cited an instance where an icy condition on Princess Street was reported and prompt action was not taken because the person responsible for the elimination of such hazards was ill. He recommended that busy streets should be patrolled to see that hazards, such as icy conditions, are corrected promptly, and that there should be a system for immediate corrective action to be taken as soon as a hazard is reported. He asked if such a system existed and if so, why it was not operating effectively.

Ald. Compton in reply stated that he had been informed by the City Engineer that a replacement had been made of the man who was ill and that the time sheet for this person credited him with eight hours for sanding Princess Street, on the day in question. He stated that matters of this nature are looked after at all times and it was merely a break in routine that caused the delay on the day in question.

Ald. Crawford remarked that the system should be "watertight" so that once a condition is reported, it is followed through.

Ald. Byron stated that two or three men had been laid off the Board of Works because they were finished watering the streets and were not required for snow removal purposes in the interim. He believed this unfair especially in the cases of men who had worked in the Department for 18 to 20 years and should be avoided in future. Ald. Megaffin pointed out that these men could have been cleaning the streets as the streets were in a bad condition downtown.

Ald. Stabler expressed the opinion that those responsible for the recent Mass X-ray Survey should be congratulated on the work they did and asked if the Council had made any contribution to the Survey. The Acting Mayor reported that no contribution had been made as far as he was aware and that the Council had never been approached. He stated that the procedure required for a contribution to be made would be for an application to be forwarded to City Council, and that such application would be considered at the same time as all other like applications. Ald. Megaffin suggested sending a letter of appreciation and the Acting Mayor said that this could be looked into.
